

A+ Beveiliging expands Altenova's expertise with fire detection, intrusion detection and CCTV systems

Altenova takes the next step in its growth trajectory. With the acquisition of A+ Beveiliging, the company adds a Dutch specialist in fire alarm systems, intrusion detection and CCTV systems to its platform. This transaction further strengthens Altenova's position in the international market for security technologies.

Strengthening fire detection and electronic security

Since 2009, A+ Beveiliging has been active as a certified installer and maintenance partner for fire alarm, intrusion detection and CCTV systems. The company has grown into a solid player in the Netherlands with approximately 25 employees and is primarily active in the regions of Amsterdam, The Hague, Rotterdam and Utrecht. Thanks to its in-depth knowledge of Dutch legislation and regulations, A+ Beveiliging benefits from a strong local presence and regulatory expertise.

Stefaan Devolder, Group CEO of Altenova:

"With the acquisition of A+ Beveiliging, we are strengthening our technical expertise while adding in-depth knowledge of the Dutch regulatory framework in fire safety and intrusion protection. This marks another step in building our group into a leading European player in security technologies."

Local expertise, international strength

A+ Beveiliging is known as an accessible organization with short communication lines and a pragmatic approach. The company designs, installs and maintains systems for a wide range of applications: from small wireless intrusion systems for residential customers to complex industrial fire alarm installations. In addition, it has a strong footprint in the retail sector. By joining forces, Altenova and A+ Beveiliging create a complementary offering in which fire detection, intrusion detection, CCTV technology and broader active fire protection solutions reinforce one another. Customers benefit from an integrated approach, strong local expertise and the scale and capabilities of a larger international group.

Leo Quirijns, CEO van A+ Beveiliging:

"Our team feels that this step is a natural next phase in our development. We are joining a group that upholds the same high standards in terms of quality, craftsmanship, and customer focus. By combining our local expertise with Altenova's international strength, we can support our clients even better and continue to invest in innovation and growth. We look forward to continuing to build a strong and future-proof organization together."

About Altenova

Altenova is an international player in active fire protection and security technologies. Formerly operating under the name Altebra, the company now continues its growth trajectory following the merger with Pyronova, building a forward-looking platform in fire safety and security solutions. Altenova offers a comprehensive range of solutions, including sprinkler and foam fire suppression systems, fire detection, fire compartmentalization and gaseous fire suppression systems. With multiple locations across Europe, the company combines strong regional presence with international expertise, supporting customers in a wide range of sectors in managing fire and safety risks.
