SofindeV realizes second add-on investment for Mabo-Lifting

Mabo Lifting NV realizes its second add-on investment with the acquisition of Mabo Engineering & Automation NV (<https://www.agv-automation.com>). The company, based in Lier, supports and integrates automation projects and specializes in automated guided vehicles (AGVs), custom-made machines with or without a driver and full warehouse automation.

Mabo Engineering & Automation offers tailor made solutions in the logistics sector. With more than 20 years of experience, the expertise of the Mabo E&A team provides the most optimal solution for each logistical challenge.

Through this acquisition, Mabo Lifting NV strategically expands its product and technology offering in the high growth Automated Guided Vehicle arena, also creating the possibility for significant synergies in purchasing, sales, and after service of its Benelux customer base.

Mabo-Lifting NV is the reference in space saving and efficiency improving forklifts in Belgium. The company is backed by leading manufacturers such as Moffett, Combilift and Innolift, with whom it has developed a long standing partnership and exclusive import rights for Belgium.

With the support of SofindeV and under the leadership of Maarten and Bram Mariën-Bouwens, Mabo-Lifting will accelerate its growth plans in the Benelux and further develop its broad offering of specialized forklifts designed to optimize logistics.
