

## Press release

### PMW Nordic joins the Altebra Group

*Over the past few years, Altebra has participated in major new-build projects in Sweden & Denmark. To expand its activities in the Scandinavian market and build a strong regional presence close to its customers, the Belgian expert in fire protection recently acquired a local Swedish stronghold, PMW Nordic.*

PMW Nordic, based in Säffle, Värmland, north of Gothenburg, has a solid reputation in fire safety and security. The company holds the SBF 1020:4 Installer Company-Fire Sprinkler System certification and has specialized personnel with SBF 1018:5 Certified Engineer-Water Sprinkler System qualifications. This makes PMW Nordic the ideal, innovation-driven partner for Altebra to continue developing projects in Sweden and exploring new business opportunities.

**Stefaan Devolder, CEO of the Altebra Group:** “We are very pleased to welcome PMW Nordic to the Altebra Group. The company shares our DNA and values, allowing us to strengthen our position in the Scandinavian market. With founder Peter Johansson we have a true sprinkler expert on board, and with his son Anders, a natural leader who can guide Altebra Sweden to future success. Given that ALT-E-BRA in Swedish means “All Is going Good” we are confident that this strategic decision will drive further growth for our operations in the region.”

The acquisition by Altebra confirms the group’s strategy to further invest in Sweden after recently completing two major projects in Gothenburg and two in Malmö.
